

Comprehensive LC-QTOF-MS Analysis for NPS in a Complex Forensic Toxicology World

SCIEX Lunch & Learn Lightning Talks – SOFT Annual Meeting – Tuesday October 31, 2023

Alex J. Krotulski, Ph.D. – Center for Forensic Science Research and Education (CFSRE)

DISCLOSURES

- I have no conflicts of interest to disclose.
- I am a scientist and employee of FRFF / CFSRE, a 501(c)(3) non-profit research and educational facility.
- CFSRE's NPS Discovery program is funded in part by the National Institute of Justice (NIJ), Office of Justice Programs (OJP), U.S. Department of Justice (DOJ).
 - Award Number: 15PNIJ-22-GG-04434-MUMU
 - The opinions, findings, conclusions and/or recommendations expressed in this presentation are those of the author(s) and do not necessarily represent the official position or policies of the U.S. Department of Justice.

NIJ | *National Institute
of Justice*

STRENGTHEN SCIENCE. ADVANCE JUSTICE.

INTRODUCTION

COMPLEX FORENSIC TOXICOLOGY WORLD

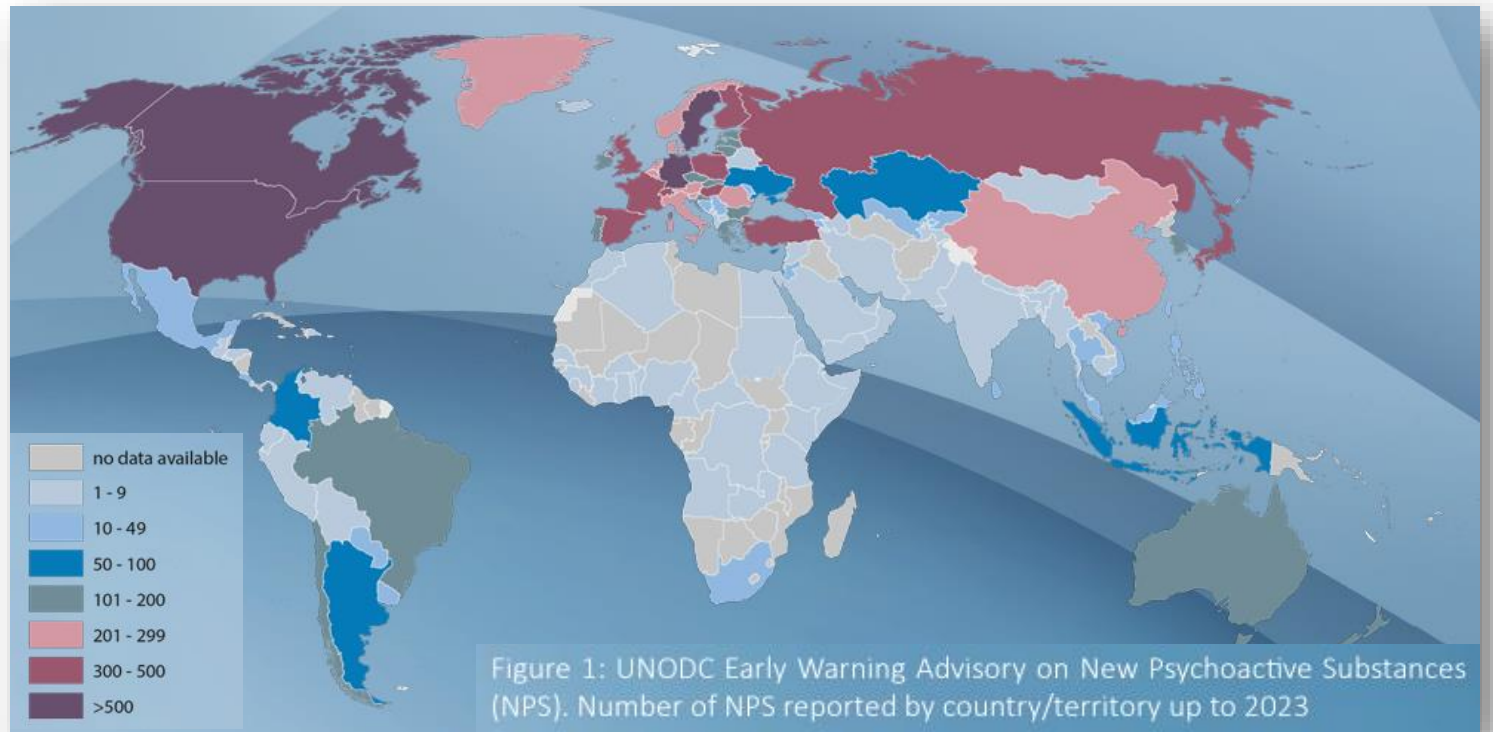

- **Dynamic and volatile** drug markets
- Increasing **polydrug use**
 - Single drug intoxications are becoming more rare
- **Scopes of testing** are being strained due to evolving drug markets
- Forensic toxicologists are being asked to **interpret complex cases** now more than ever

Fentanyl Co-Positivity (“Nested Waves”)

WHAT ARE “NPS”?

- **Novel (or new) psychoactive substances (NPS)** is a catch-all term that captures most drugs outside traditional and therapeutic categories, also referred to as “designer drugs”
 - Newly synthesized or discovered
 - New to the drug supply
 - Used in a new way or manner
 - Altered toxicological effect profile
- **Five major subclasses of NPS**
 - Benzodiazepines
 - Opioids
 - Stimulants
 - Hallucinogens
 - Cannabinoids

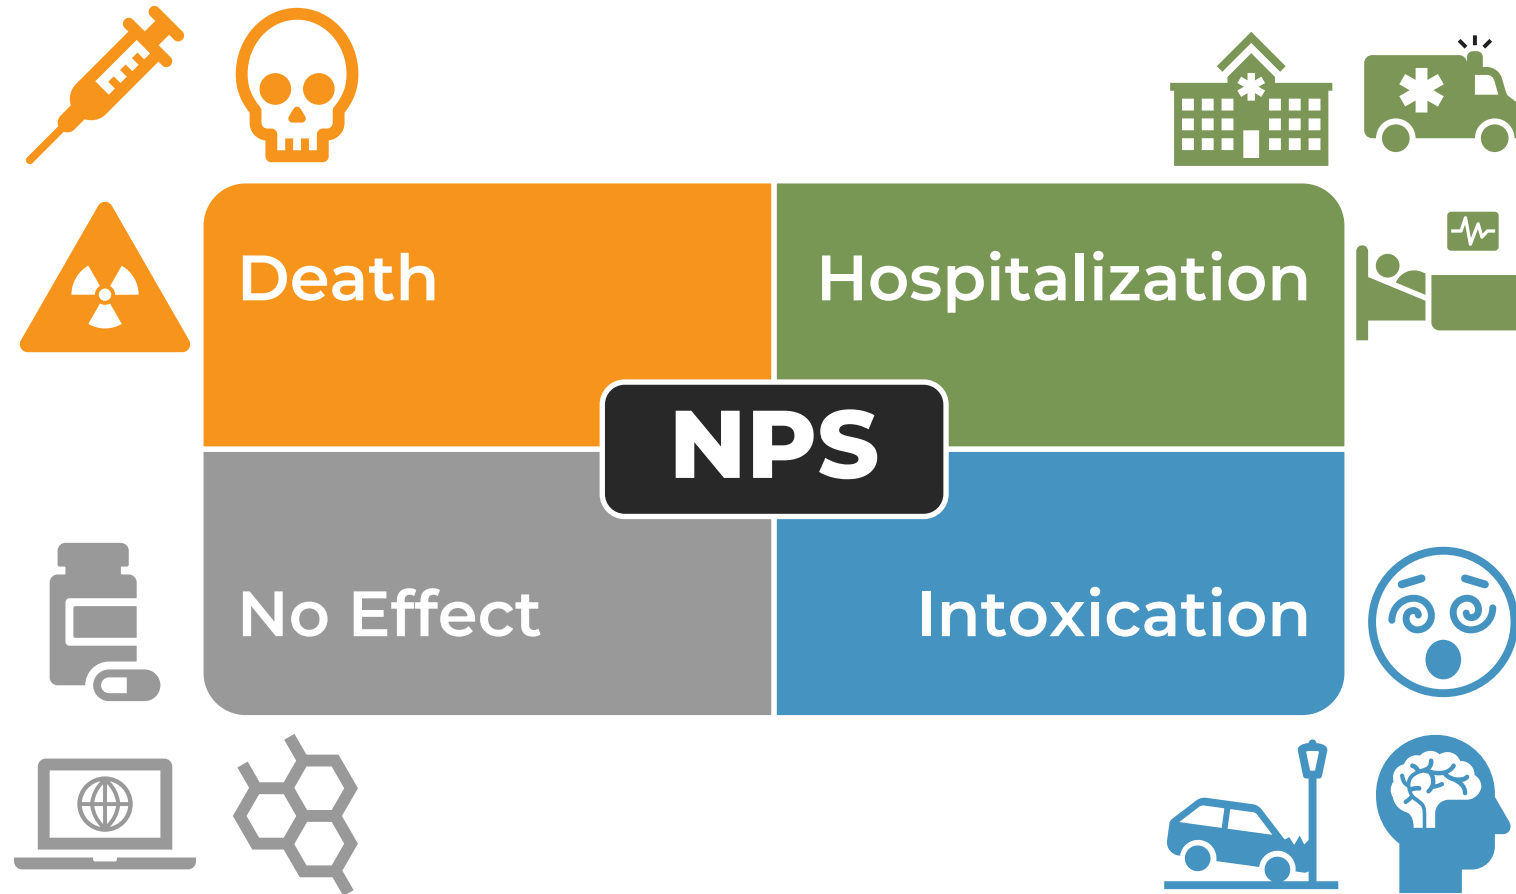

WHY ARE NPS POPULAR?

- **Consumers**
 - New highs / more desirable effects
 - Easier to source than tradition drugs
 - Legal status (or avoid illegal status)
 - Beat traditional drug tests
- **“Manufacturers” / Processors**
 - Cheaper alternatives
 - Desirable combined drug effects
 - Legal status (or avoid illegal status)
- **NPS are often unknown to consumer / processors**

WHERE DO NPS APPEAR?

EMERGENCE OF NPS IN THE U.S.

- Since 2018, NPS Discovery has reported **145** newly discovered NPS (and counting)
- **NPS opioids** remain the largest subclass of newly emerging drugs encountered
- As of June 2023, NPS Discovery has reported **8** NPS for the first time this year

LANDSCAPE OF NPS IN THE U.S.

- Since 2018, NPS Discovery has identified **more than 225** NPS in forensic samples
- **NPS opioids**, **stimulants**, and **cannabinoids** represent the largest subclasses observed

Figure 3: Breakdown by subclass of individual NPS detected, 2018-2022.

Figure 4: Individual NPS detected each year, cumulative since 2018.

WORKFLOWS & METHODS

FORENSIC LABORATORY

- The Center for Forensic Science Research and Education (CFSRE)
 - 501(c)(3) non-profit research and educational facility
 - *Surveillance & Casework*

Waters Xevo® G2-S LC-QTOF-MS

Sciex X500R LC-QTOF-MS

Sciex TripleTOF® 5600+ LC-QTOF-MS

Agilent 6495 LC-QQQ-MS

Agilent 6430 LC-QQQ-MS

Waters TQS LC-QQQ-MS

Waters TQD LC-QQQ-MS

Agilent 5975 GC-MS

Agilent 5975 GC-MS

LC-QTOF-MS ASSAYS

Basic Liquid-Liquid Extraction

- *Broad-based drug screening for NPS (excluding synthetic cannabinoids)*
- **Procedure:**
 - Add 1 mL of Borax buffer, pH 10.4
 - Add 3 mL of 70:30 *N*-butyl chloride and ethyl acetate
 - Cap and rotate for 10 mins at 40%
 - Centrifuge 4600 rpm for 15 minutes
 - Freeze pour and transfer supernatant
 - Drydown in TurboVap at 35 °C, 10 psi, for 30 mins
 - Reconstitute for LC-MS analysis

Acidic Liquid-Liquid Extraction

- *Capture synthetic cannabinoids, their metabolites, and other acidic drugs*
- **Procedure:**
 - Add 1 mL of 5% phosphoric acid in water (v:v)
 - Add 3 mL of 80:10:10 hexane, EtOAc, and MTBE
 - Cap and rotate for 10 mins at 40%
 - Centrifuge 4600 rpm for 15 minutes
 - Freeze pour and transfer supernatant
 - Drydown in TurboVap at 35 °C, 10 psi, for 30 mins
 - Reconstitute for LC-MS analysis

LC-QTOF-MS ASSAYS

15.5-minute General Screening Method

7-minute Synthetic Cannabinoid Method

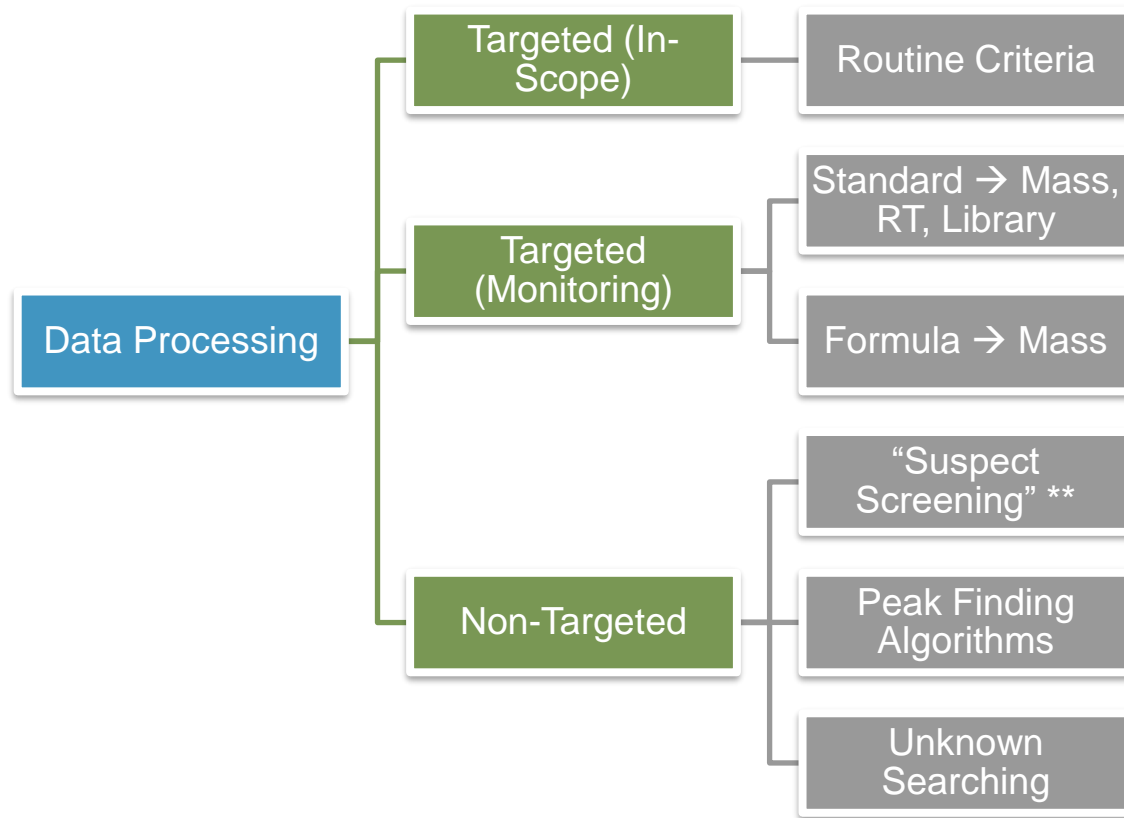

LC-QTOF-MS ASSAYS

- Liquid chromatography quadrupole time-of-flight mass spectrometry (LC-QTOF-MS)
- Information Dependent Acquisition (IDA)
- SWATH Acquisition (DIA) – Primarily Used

LC-QTOF-MS ASSAYS

WORKFLOWS TO DISCOVERY NEW NPS

▪ Sample-Mining (Prospective):

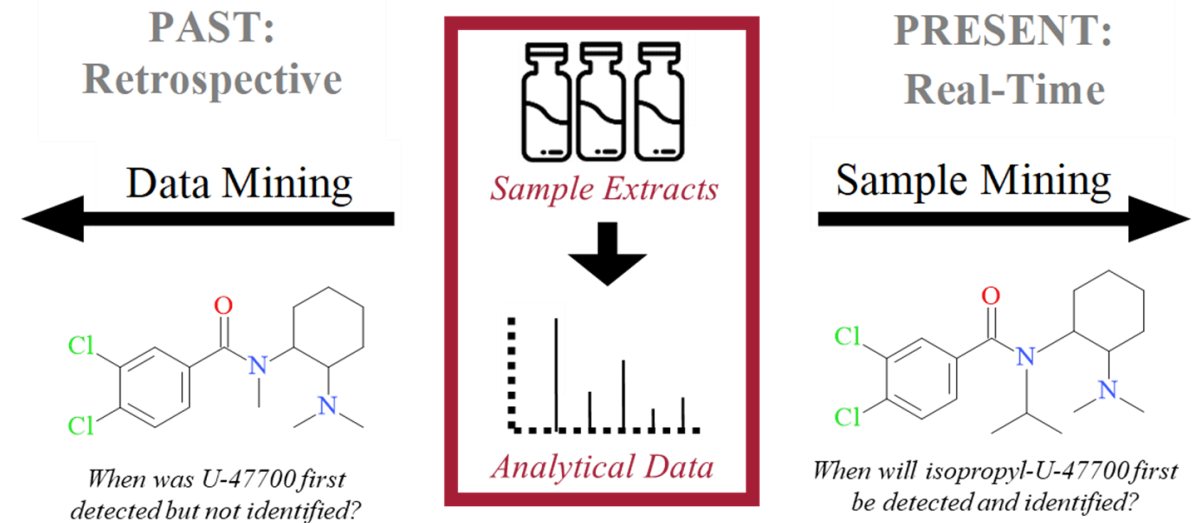

- Use of discarded authentic sample extract vials
- High-ish volume, higher rate of incidence
- Best for trend data

▪ Data-Mining (Retrospective):

- Use of electronic mass spectrometry datafiles
- Gives historical perspective
- Not ideal way to discover NPS

▪ Real-Time Surveillance / Case Analysis:

- Extraction and analysis of biological samples from forensic investigations
- Individual case basis but often can give insights into trending information

EXAMPLES OF NEW DISCOVERIES

- **Important** → Assessing the right populations paired with good intelligence
- **Toxicology:**
 - Collaboration with medical examiner / coroner offices → Assist in determining MOD and COD
 - Initial toxicology testing negative but “suspected opioid death”
- **Drug Material:**
 - Plant-like material submitted from PDPH / contained peak not in library database
 - Structural elucidation → new synthetic cannabinoid: ADB-5'Br-BINACA
- **Intelligence:**
 - Monitor online surface web gray market sites → new nitazene analogues
 - Purchase to confirm identity before first forensic case???

CONTINUAL DEVELOPMENT OF DATABASE

Sciex X500R LC-QTOF-MS

Sciex TripleTOF® 5600+ LC-QTOF-MS

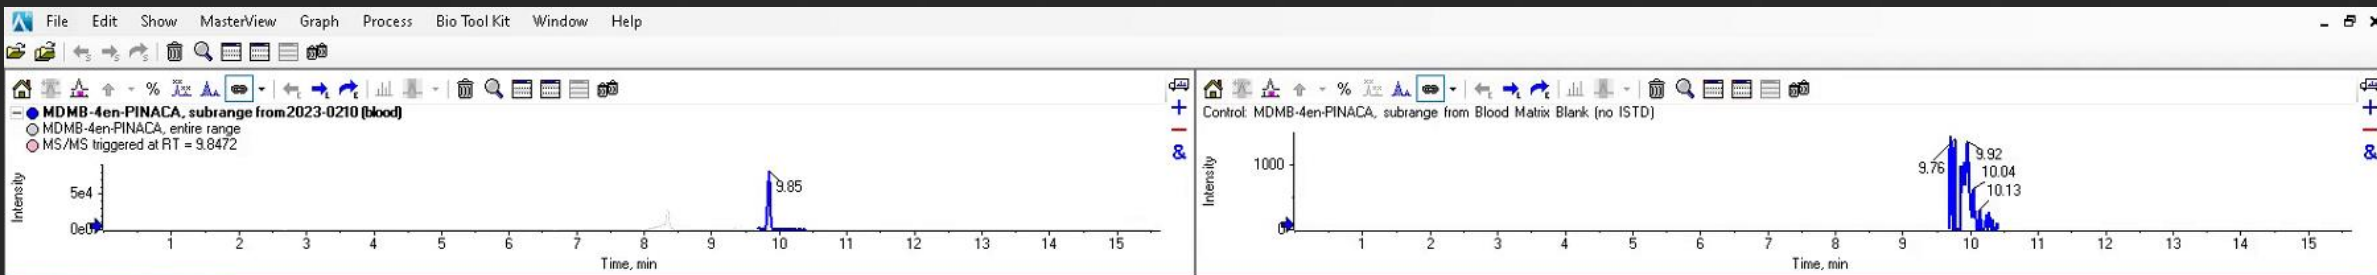

- Drug of Abuse
- Incidental
- NPS
- Pharmaceutical
